Category:	metacat	Estimated time:	0.00 hour
Target version:	Unspecified	Spent time:	0.00 hour
Bugzilla-Id:	3033		

Description

When someone who hasn't logged into the KNB (www.knb.ecoinformatics) uses the link to register a dataset they get a login window. After logging in a window with this information is shown.

```
__element 'login'      |__text '\n '          |__element 'message'   | |__text 'Authentication successful for user:
uid=bowdish,o=NCEAS,dc=ecoinformatics,dc=org' |__text '\n\n '      |__element 'sessionId' | |__text
'1377A5694AC8E55FD6C8B858B84DB545'         |__text '\n\n'     |__element 'name'       | |__text '\nCallie
Bowdish\n'          |__text '\n\n '          |__element 'isModerator' |__text '\n'
```

There is no way to get back to the KNB homepage or the registry from this window.

History

#1 - 12/19/2007 03:05 PM - Shaun Walbridge

Fixed in knb.xml by re-enabling login.xsl processing for the KNB skin; diff with previous version:

<http://cvs.ecoinformatics.org/cvs/cvsweb.cgi/metacat/lib/style/skins/knb/knb.xml.diff?r1=1.5&r2=1.6&f=h>
