Ecoinformatics - Bug #3034

The KNB site uses two headers with different homepages

Description

This is what I think of as the KNB homepage

http://knb.ecoinformatics.org -- or -- http://knb.ecoinformatics.org/index.jsp

Yet the KNB project link and other links in the "about the KNB project section" link to a page with a header that is different than the one above.

http://knb.ecoinformatics.org/home.html

One idea is to change the name of this group of pages to the KNB project and give a link back to home that goes to http://knb.ecoinformatics.org

I think they should use similar headings instead of be so different.
