Kepler - Bug #3036

Need to be able to delete actors from the library

12/18/2007 02:48 PM - Dan Higgins

Description

We can now add a customized or new actor to the user library, but there is no way to remove actors without deleting the entire .kepler directory (or at lease the part with actor info).

Need a "Delete Selected Actor" menu, perhaps as a context menu (popup) menu item?

History

#1 - 03/17/2008 01:33 PM - Chad Berkley

There is now a right click menu item to remove a component from the library. It removes the component from the cache by LSID. This functionality might need to be tweaked to just remove the actor from a subtree, but for now it removes it from the tree entirely.
