

Kepler - Bug #3063

CommandLineExec actor does not generate Exit code

01/11/2008 01:41 PM - Dan Higgins

<b>Status:</b>	Resolved	<b>Start date:</b>	01/11/2008

<b>Target version:</b>	1.0.0	<b>Spent time:</b>	0.00 hour
<b>Bugzilla-Id:</b>	3063		
<b>Description</b> Supposedly, the CommandLineExec actor will generate a '1' on the exitCode output when the execution of the command line is successful. Apparently this does NOT happen under Windows; nothing appears on the output if the command does not send anything to SysOut. This makes it impossible to run a command line operation in the middle of workflow and use it to trigger further actors.  See the example \$KEPLER/workflows/eco/maxent.xml  Dan Higgins - Jan 2008			

History

#1 - 01/11/2008 03:11 PM - Dan Higgins

Fixed the code so that it does return a '1' on the exitCode port when there is no error in executing the Command Line.

It turned out that this was not specifically a Windows problem (also occurred under Mac Unix).
