#### Description

With the new routines for creating a profile (ie those tha use the full ldap name), if one checks out a new version of Morpho and starts building a new profile but keeps an old profile directory, there is an error that kills Morpho when one tries to log in. (also, no ldap 'name' appears above the password box).

The problem only occurs when trying to use an existing profile data

#### History

##### #1 - 10/31/2001 10:59 AM - Dan Higgins

I cannot reproduce this error (although I originally reported it!). It seems to be working OK now. ???
