Kepler - Bug #3089

Actor port properties lost after saving to library

01/22/2008 04:12 PM - Shawn Bowers

Target version:	1.0.0rc1	**Spent time:**	0.00 hour
Bugzilla-Id:	3089		

Description

If I select an actor (e.g., Garp Prediction), add a semantic type to one of its input ports, and save it back to the library (e.g., as My Garp Prediction), when I drag the actor back onto the canvas, the semantic type property is no longer available (it somehow was "lost in translation"). This happens with the latest version/update of Kepler and PTII (02/22/08).

History

#1 - 01/28/2008 01:11 PM - Chad Berkley

There was a bug in ActorMetadata where ports get added to the namedObj. The port attributes were getting added to the wrong object so it wasn't showing up.
