<b>Description</b> We included a set of R executables for Windows as of beta3 and plan on doing so also for RC1. However, we do not include R for the Mac or Linux.  We need to consider whether we want to include the binaries as part of the installer. Mac installer is about 58 MB so there is a size issue. (Also do we want to include even the Windows version in CVS for nightly build?)  Dan Higgins - Jan 2008
