Description

The problems below are probably common knowledge, but I've fixed up the "about:" facility so that it will traverse the demos and try to open them. This makes it much easier to quickly try these out.

The first Ecological Niche Modeling (GARP) Workflow:
Baseline 3-Actor GARP -Browser Display demo fails.

This is the first Kepler Demo. . .

We should not be linking to any workflows that do not work. All html links need to be checked and if any broken workflow links are found, they should be removed.

A workflow in the workflows/ folder doesn't affect Kepler 1.0, since we're not releasing it, just demos/
