Kepler - Bug #3129

links exist to ptII demos that do not work

02/05/2008 01:18 PM - Chad Berkley

Status:	Resolved		**Start date:**	02/05/2008

Target version:	1.0.0rc1		**Spent time:**	0.00 hour
Bugzilla-Id:	3129			

Description
There are links in the documentation for kepler to ptII demos that don't work. These demos need to be pulled out. The plan is to create a list of ptII demos that do work and eliminate the link to the ptolemy documentation from which they are currently linked.

History

#1 - 02/05/2008 06:47 PM - Christopher Brooks

If you tell me what demos to exclude, I can update
completeDemosPtinyKepler.htm in the rel-7-0-beta-2 branch and the trunk

That file is derived from completeDemos.htm by running "make update"
in that directory. What links end up in completeDemosPtinyKepler.htm
is determined by file directives
<!--/ptinyKeplerDocs-->
<!--ptinyKeplerDocs-->

I excluded SmartSender from completeDemosPtinyKepler,
both the ptII trunk and the rel-7-0-beta-2,
though I'm not sure why SmartSender is not in Kepler1.0.0rc1.
However, I think it is fine not to include it.
Below is my original post about the missing demo.

- The Splashscreen has a "Documentation" link that leads to
  "Background information" on Ptolemy.

  Background information leads to completePtinyKeplerDemos.htm
  which has a link under DE to SmartSender

  ptolemy/domains/de/demo/SmartSender/SmartSender.xml is not found.

  To check for this, go to the Ptolemy copyright link and click
  "Other copyrights about this configuration"
  which goes to another page, click
  "Other information about this configuration" on the new page

  Then click "Open the .htm, .html, .xml and pdf" for
  completeDemosPtinyKepler.htm.

I looked into this, and I think the problem is that I was running out
of memory, see http://bugzilla.ecoinformatics.org/show_bug.cgi?id=3106

SmartSender *is* present, I *can* open it.

However, if I remove it from completeDemosPtinyKepler.htm, then opening
all the demos fails on the *next* model.
