Description

I'm currently getting the following error with the demos/R/dataFrame_R.xml workflow when trying to run it under Parallels:

Error in file(file, "r") : unable to open connection
In addition: Warning message:
cannot open file '////.PSF//.Home//.kepler//cache////cachedata//urn.lsid.localhost.7a976669.0.0', reason 'Invalid argument'
Execution halted

All other R demos work fine. I've tried deleting .kepler and restarting to no avail. Others have reported success under Parallels.
