Bugzilla-Id:	317		
Description			
<p>Under the table editor - the attributes 'case-sensitive' and 'orientation' show up in print in the left hand column but if you go to edit that information nothing is displayed as being in those attributes.</p> <p>James</p>			

History

#1 - 11/30/2001 03:47 PM - Matt Jones

Not a bug. They don't show up in element list because this info is encoded as XML attributes, and it is visually difficult to assess whether XML attributes are present.

#2 - 12/02/2001 04:02 PM - Dan Higgins

This is not a bug but rather a mistake in understanding that certain parameters are stored in XML attributes rather than text fields. Currently attributes are accessed via a tree right click menu item rather than showing up in the fields in the right hand frame. Eventually, we will change the way attributes are edited. For now, suggest modifying documentation for this element to indicate that popup menu should be used.
