#### Description

Matt,

Shouldn't the enumerated domain be repeatable? Perhaps I'm not using it right but say I've got 5 life zones coded into integers 1-5 for a given attribute - how do I define this domain?

James

#### History

##### #1 - 12/10/2001 02:30 PM - Matt Jones

Enumerated domain is repeatable. Select the "enumeratedDomain" tag, right click on the element name, and select "Duplicate" from the menu that appears. The content model of relevance is:

```
<!ELEMENT attributeDomain ( enumeratedDomain+ | rangeDomain+ )>  
Closing bug because it is not a problem AFAICT.
```
