

Morpho - Bug #3190

profile names with spaces and special characters are a problem

03/27/2008 09:47 AM - Callie Bowdish

Description

Morpho and the online account creation tool allows users to create a profile name with special characters or spaces. I have seen accounts that use spaces or special characters have problems with saving and working with data packages.

A data package created with a profile name that has a space in it will save locally but when you try to save it to the network you get the following error.

Name: action => insert

Name: public => no

message from server: <?xml version="1.0"?>

<error>

cvc-datatype-valid.1.2.1: 'ecogrid://knb/test space.3.1' is not a valid 'anyURI' value.

</error>

MetacatUpload Exception in EML200DataPackage!

<?xml version="1.0"?>

<error>

cvc-datatype-valid.1.2.1: 'ecogrid://knb/test space.3.1' is not a valid 'anyURI' value.

</error>

Problem Saving

<?xml version="1.0"?>

<error>

cvc-datatype-valid.1.2.1: 'ecogrid://knb/test space.3.1' is not a valid 'anyURI' value.

</error>

Perhaps we need to create a constraint for allowable profile names. The least that can be done is note that the spaces or special characters should not be used for profile names. I have seen this problem a number of times.

History

#1 - 08/06/2008 10:15 AM - Callie Bowdish

Spaces #, comma, -, &, * (, + can cause problems if part of a profile

#2 - 08/06/2008 10:15 AM - Callie Bowdish

Spaces #, comma, -, &, * (, + can cause problems if part of a profile

#3 - 08/25/2008 09:00 PM - Jing Tao

Add code in ProfileDialog.java to check those character. However, we check the identifier prefix value, not profile name.

#4 - 08/12/2009 03:48 PM - Jing Tao

move to 1.7
