Description			
We are currently including 2.4 in the windows installer. we'd like to upgrade that to 2.6 and also see if we can get R in the installer for linux and osx.			

History

R 2.6.2 is now included in the windows and mac installer. We may want to have a non-R installer for both mac and windows because the size of R is pretty large. ~22MB for windows and ~60 MB for the mac. I'm not sure why it's so much larger for the mac.
