Bugzilla-Id:	3211		
Description			
Kirsten wants to include the actor documentation in an indexed PDF along with the release. We need to write an XSLT stylesheet to transform all of the actor documentation into html so that it can be crawled by a pdf maker. We also need to have the XSLT create a table of contents. We've done something similar with EML.			

History

#1 - 04/09/2008 10:14 AM - Chad Berkley

created stylesheet and build target to build the actor documentation and an index to go with it.

#2 - 03/27/2013 02:22 PM - Redmine Admin

Original Bugzilla ID was 3211
