

Metacat - Bug #3217

Create simple transformations to present permissions error messages in styled format

04/10/2008 11:19 AM - Shaun Walbridge

Status:	New	Start date:	04/10/2008

Target version:	Unspecified	Spent time:	0.00 hour
Bugzilla-Id:	3217		
Description			
<p>Currently permissions errors are rendered to the client as raw XML documents, which will be handled differently on a per-browser basis, and are visually distinct from our skinned pages. A simple solution would be to provide a basic transformation to present these messages within the skinned format.</p> <p>Example 'permission denied' page: http://dev.nceas.ucsb.edu/knb/metacat?action=read&qformat=sanparks&docid=judithk.335.1</p>

It would be useful to have the error page for insufficient privileges also provide a login prompt so that one could immediately login and go straight to the desired page.
