Kepler - Bug #3220

"Save" from TextEditor interferes with workflow save-before-closing prompt

04/14/2008 12:15 PM - ben leinfelder

Bugzilla-Id:	3220			

Description

While editing an RExpression script using the built-in TextEditor ("Open Actor"), Kevin Drury found that if he used "Save" from within the text editor window to save the contents of the script, closed that editor window, then closed the workflow window (that contained other unsaved changes), Kepler would not prompt him for a confirmation to save before closing the workflow. All changes would then be lost.
I've reproduced this behavior (we are both on a Mac).

History

#1 - 04/14/2008 02:23 PM - ben leinfelder

aaron will take a look at this - really dives into the ptolemy code. Some starting places:
ptolemy.actor.gui.Effigy
ptolemy.actor.gui.TextEditor
ptolemy.vergil.toolbox.TextEditorForStringAttributes

#2 - 06/23/2008 06:36 PM - Aaron Aaron

ptolemy.vergil.toolbox.TextEditorForStringAttributes

This patch improves the way TextEditorForStringAttributes handles modified text and fixes bug 3220.

#3 - 06/23/2008 06:38 PM - Aaron Aaron

This patch fixes the bug but it still needs to be integrated into the ptolemy tree before we close this out.

#4 - 09/03/2009 04:20 PM - Aaron Aaron

Ben can you check in this patch? I can't figure out how to check files into the Ptolemy svn repo. Thanks

#5 - 03/27/2013 02:22 PM - Redmine Admin

Original Bugzilla ID was 3220
