

Metacat - Bug #3224

Perl code should rely on canonical organization list provided by Metacat

04/15/2008 03:54 PM - Shaun Walbridge

Status:	New	Start date:	04/15/2008
Priority:	Normal	Due date:

Target version:	Unspecified	Spent time:	0.00 hour
Bugzilla-Id:	3224		

Description

src/perl/ldapweb.cgi and lib/style/common/templates/loginForm.tmpl both have their own versions of the organization list. Once a Metacat function has been added for generating this list, the Metacat.Pm module should be extended to support this function, and these files should be updated to use the new list.

An interim solution is using a new property to manage the list until [#3104](#) closes.
