Bugzilla-Id:	3244		

Description

Currently, morpho is using an incorrect version of EML201 schema. We should use tag RELEASE_EML_2_0_1.

In eml-resource.xsd:

```
<xs:element name="references">
```

```
<xs:annotation>
```

```
<xs:appinfo>
```

```
<doc:tooltip>References</doc:tooltip>
```

```
<doc:summary>The id of another element in this  
EML document to be used to here in this context.
```

```
</doc:summary>
```

```
<doc:description>The id of another element in  
this EML document to be used to here in this context.
```

```
This is used instead of duplicating information when an identical  
piece of information needs to be used multiple times in an  
EML document. For example, if the same person is the creator,  
metadataProvider, and contact for a dataset, their name and address  
can be provided once as part of the "creator" element, and then  
their "id" can be used in the "references" element of  
metadataProvider and contact. This reduces the likelihood of  
error by reducing redundancy, and allows one to specify that  
two pieces of information are identical. To be a valid EML  
document, the content of every "references" element MUST be  
defined in the document as the value of an "id" attribute on  
some element within the document. Other critical rules  
about the use of IDs and references in EML are provided in the  
text of the EML specification.</doc:description>
```

```
<doc:example>knb.45.3</doc:example>
```

```
</xs:appinfo>
```

```
</xs:annotation>
```

```
<xs:complexType>
```

```
<xs:simpleContent>
```

```
<xs:extension base="xs:string">
```

```
<xs:attribute name="system" type="SystemType" use="optional" default="document"/>
```

```
</xs:extension>
```

```
</xs:simpleContent>
```

```
</xs:complexType>
```

```
</xs:element>
```

History

#1 - 07/08/2008 03:14 PM - Jing Tao

Changed it with the correct eml-resource.xsd (version 1.78 with tag RELEASE_EML_2_0_1).

#2 - 08/12/2009 03:49 PM - Jing Tao

move to 1.7

#3 - 03/27/2013 02:22 PM - Redmine Admin

Original Bugzilla ID was 3244
