

## Kepler - Bug #3251

### Installer Splash Screen should be an HTML Widget

04/30/2008 08:05 AM - Christopher Brooks

<b>Description</b>			
Is there anyway to use an HTML widget for the Installation Screen here? The Ptolemy IzPack Installer uses an HTML widget, it looks more polished. The text widget in courier looks primitive. The links to the open bugs list is long and awkward, cutting and pasting is difficult. I'm not sure if the IzPack HTML widget supports opening links though.

#### History

##### #1 - 04/20/2009 02:25 PM - Christopher Brooks

I'm the reporter on this, it was assigned to Dan Higgins, I'm reassigning it to Chad for his configuration. The issue is that the izPack installer should use the HTML widget for the installation screen.

In the ptll tree, see

ptll/adm/gen-7.0/ptll7\_0\_devel\_setup.xml

where I have

```
&lt;res id="HTMLInfoPanel.info" src="index.htm"/&gt;
  &lt;res id="HTMLLicencePanel.licence" src="copyright.htm"/&gt;
  &lt;res id="InfoPanel.info" src="../../README.txt"/&gt;
...
&lt;panels&gt;
  &lt;panel classname="HelloPanel"/&gt;
  &lt;panel classname="HTMLInfoPanel"/&gt;
  &lt;panel classname="HTMLLicencePanel"/&gt;
  &lt;panel classname="TargetPanel"/&gt;
  &lt;panel classname="PacksPanel"/&gt;
  &lt;panel classname="SummaryPanel"/&gt;
  &lt;panel classname="InstallPanel"/&gt;
  &lt;panel classname="ShortcutPanel"/&gt;
  &lt;panel classname="FinishPanel"/&gt;
&lt;/panels&gt;
```

##### #2 - 07/10/2009 02:36 PM - Chad Berkley

I'm going to close this for now. If someone really doesn't like the textual readme, I guess we can change it but it seems ok to me.

##### #3 - 07/10/2009 03:13 PM - Christopher Brooks

The problem is that the links in the installer screen are not mouse sensitive.

A textual installer readme screen looks less polished.

This is a really quick fix in izPack, just use HTMLInfoPanel, see this bug for details.

##### #4 - 07/10/2009 05:16 PM - Chad Berkley

Ok, readme is now an html document.
