Category:	installer		**Estimated time:**	0.00 hour
Target version:	Unspecified		**Spent time:**	0.00 hour
Bugzilla-Id:	3252			

Description

In the Kepler 1.0.0 IzPack installer splash screen, there is a
missing "S" and an extra </p> in the Ptolemy support statement:

Ptolemy receives support in part from the Center for Hybrid and Embedded
oftware Systems (CHESS) at UC Berkeley, which receives support from the
^ Missing S

Hewlett Packard, Infineon, Microsoft, and Toyota.</p>
^

I updated kepler/README.txt in the devel and release branch with new   text. To close this, a new
installer would need to be made and
the text checked.

History

#1 - 04/30/2008 10:30 AM - Chad Berkley

I'm going to go ahead and close this bug since it's fixed in cvs. I'll go back and check all of the 3245 blockers when I build the next round of installers
to make sure they are indeed fixed in the installer.

#2 - 05/07/2008 02:30 PM - ben leinfelder

this is still a problem in the linux and OSX v3 installers

#3 - 05/07/2008 02:47 PM - Jing Tao

It is still a issue in windows,mac and linux installer.

#4 - 05/07/2008 02:54 PM - Chad Berkley

this didn't get checked into the branch. it's in there now.

#5 - 05/09/2008 10:49 AM - Jing Tao

It looks good now in mac v4 installer.

#6 - 05/09/2008 11:23 AM - Aaron Aaron

Looks good in win and mac v4 installers
