Kepler - Bug #3256

path problems on Mac with CommandLine demo workflows

04/30/2008 10:52 AM - Dan Higgins

Description

On 1.0 release installer check, the CommandLine_1 and CommandLine_2 demo workflows (in demos/getting-started dir) fail with a path problem on the Mac.

This is apparently due to moving the demos directory.

History

#1 - 04/30/2008 10:58 AM - Dan Higgins

The demos/getting-started/03_ImageDisplay.xml example also fails on the Mac

It looks like moving the demos dir up one level causes a problem with any workflow that uses the 'property("KEPLER") expression!

#2 - 04/30/2008 11:32 AM - Chad Berkley

Solution is to create a symbolic link in the Kepler.app/Kepler directory back to the /Applications/Kepler/demos directory. I'm doing this now with the installer. it worked with a manual first pass.

#3 - 04/30/2008 11:53 AM - Chad Berkley

fixed with method from comment 2.

#4 - 05/07/2008 02:41 PM - ben leinfelder

ran both demos in OSX - worked great (v3 installer).

#5 - 05/07/2008 03:29 PM - Jing Tao

both work flows worked in Mac

#6 - 05/07/2008 04:01 PM - Aaron Aaron

looks good in Mac and win (v3 installer)
