This should be changed. nothing should depend on build.xml in the installed version of kepler.

Pick any text file that is in the release. The workflow just counts lines. I had assumed that build.xml would be there

#3 - 05/02/2008 01:14 PM - Derik Barseghian

Changed it to use itself instead of build.xml.

#4 - 05/07/2008 03:36 PM - ben leinfelder
