

## Kepler - Bug #3273

### Improve authentication dialogue so that the reason for authentication is clear

05/05/2008 10:03 AM - ben leinfelder

<b>Status:</b>	Resolved	<b>Start date:</b>	05/05/2008

<b>Bugzilla-Id:</b>	3273		
<b>Description</b>			
As it exists currently, the LDAP authentication mechanism is reused for a number of authentication scenarios. It is not always clear why a login prompt is being presented (is this for searching? uploading an actor to the repository? etc...).

### History

#### #1 - 05/06/2008 10:10 AM - ben leinfelder

Now that some of the threading issues are being hammered out, this should be easier to work with. Adding a message area that can hold text that describes the resource needing authentication would be a logical next step. The authentication "domain" is already shown in the frame title of the dialogue box.

#### #2 - 08/05/2009 04:07 PM - ben leinfelder

Now the authentication domain is missing from the title bar. This should be readded - as soon as authentication is working again

#### #3 - 08/11/2009 11:38 AM - ben leinfelder

Readded the Domain to the title

#### #4 - 03/27/2013 02:22 PM - Redmine Admin

Original Bugzilla ID was 3273
