| <b>Description</b><br>I upgraded to ubuntu 8.04 today, and now the GDAL_h1K_NS workflow is giving an exception (i'm using java 1.5.0_13).<br><br>ptolemy.kernel.util.IllegalActionException: in .GDAL_h1K_NS.manager<br>Because:<br>/home/barseghian/Kepler-1.0.0/lib/libgdalactor.so: Can't load IA 32-bit .so on a IA 32-bit platform<br><br>Maybe this workflow just needs an annotation warning like the other ENM ones? After a few attempts the Exception changes to a java.lang.NoClassDefFoundError |              |                 |            |

SEEK/garpModel\_ImageJ, also gives a similar "Can't load IA 32-bit..." problem on ubuntu 8.04.  
  
ENM/GARP\_Multispecies\_V, and ENM/GARP\_SingleSpecies\_BestRuleSet-IV also give me this error under this version of ubuntu, so I propose we put some kind of similar warning annotation on garpModel\_ImageJ and GDAL\_h1k\_NS.

Ah, I see comment [#2](#) on bug 3291 now (general disclaimer in demos/Readme.txt for all workflows).  
I will bump this to post-1.0 and remove it blocking 3245.
