Description
When i started metacat, i saw this message: [ERROR]: Error in MetaCatServlet.checkIndexPaths: An I/O error occured while sending to the backend.

History

#1 - 05/14/2008 02:50 PM - Jing Tao

This message was caused by put EML201DocumentCorrector in initialize method. In EML201DocumentCorrector class, a db connection was closed then returned to connection pool. This is not correct. We shouldn't close it. After comment out the db connection close statement, the error message is gone.
