Bugzilla-Id:	333		

Description

Need to add the core fields to the package wizard to allow for a reasonably complete metadata set using only the package wizard. For the first screen (eml-dataset), this means adding a "rights" field and an "abstract" field at a minimum. We should also seriously consider coverages, including the FGDC bounding box (spatial) and taxonomic and temporal coverage.

Need to systematically review the rest of the screens and make informed decisions about which fields should be included.

History

#1 - 12/10/2001 05:19 PM - Chad Berkley

added the rights and additional Info fields. need to evaluate the rest of the wizard screens still.

#2 - 12/16/2001 01:52 PM - Chad Berkley

this is complete.
