FIRST - Bug #3345

searching produces wrong and inconsistent results

Description

When searching locally for a data package from the search dialog, I get inconsistent results. In my morpho I have 2 assessments, one with title 'Midterm 1' and one with title 'Midterm 3'. When I search, I get odd results:

```
Search term      Search results/ expected results
----------       -------------
blank            Both packages returned/ both
'Midterm 1'      0 results/ one package
'Midterm 3'      0 results/ one package
'Midterm'        0 results /both
'M'              Both packages returned/ both
```

To fix this, actual results should match expected.

History

#1 - 11/25/2008 03:08 PM - ben leinfelder

turns out we aren't searching element attributes.
the Assessment Title is currently stored in assessment/@title (i.e. <assessment title="Midterm 1" />)

#2 - 11/26/2008 02:44 PM - ben leinfelder

changed the EDML schema to use elements rather than attributes. Now the search will work as expected
