

FIRST - Bug #3353

ResponseItem subclasses do not write answers to XML

06/02/2008 10:17 AM - Bridger Hamilton

Status:	New	Start date:	06/02/2008
Priority:	Normal	Due date:	
Assignee:	Ryan McFall	% Done:	0%
Category:	parser	Estimated time:	0.00 hour
Target version:	post-clientprototype	Spent time:	0.00 hour
Bugzilla-Id:	3353		
Description			
Several of the classes that override the ResponseItem abstract method generateXML have the ability to store a correct answer. None of them, however, include this in the XML representation they generate.

This is something to pay attention to a bit more closely. Though the parser interface does not currently provide a way to designate correct answers (for multiple choice nor for short answer etc...)

#2 - 02/24/2009 05:52 AM - Ryan McFall

I changed this to client-prototype, but I'm not actually sure I envision this happening even at that point.

#3 - 09/30/2009 10:49 AM - Ryan McFall

Since we aren't asking the user to specify what the correct answer is as part of the parsing process, this would be a non-trivial task to complete. Therefore I'm pushing it off to the post-prototype stage.

This is tied to the notion of rubric, and we've decided that we won't support rubrics at the prototype stage.
