# FIRST - Bug #3353

# Responseltem subclasses do not write answers to XML

06/02/2008 10:17 AM - Bridger Hamilton

Status: New Start date: 06/02/2008 **Priority:** Normal Due date: Assignee: Ryan McFall % Done: 0% Category: **Estimated time:** 0.00 hour parser Target version: post-clientprototype Spent time: 0.00 hour

# Bugzilla-ld: Description

Several of the classes that override the ResponseItem abstract method generateXML have the ability to store a correct answer. None of them, however, include this in the XML representation they generate.

## History

#### #1 - 10/03/2008 11:40 AM - ben leinfelder

3353

This is something to pay attention to a bit more closely. Though the parser interface does not currently provide a way to designate correct answers (for multiple choice nor for short answer etc...)

## #2 - 02/24/2009 05:52 AM - Ryan McFall

I changed this to client-prototype, but I'm not actually sure I envision this happening even at that point.

#### #3 - 09/30/2009 10:49 AM - Ryan McFall

Since we aren't asking the user to specify what the correct answer is as part of the parsing process, this would be a non-trivial task to complete. Therefore I'm pushing it off to the post-prototype stage.

This is tied to the notion of rubric, and we've decided that we won't support rubrics at the prototype stage.
