

FIRST - Bug #3355

Formulas don't work with Excel Data Sources

06/03/2008 04:41 AM - Ryan McFall

Status:	Resolved	Start date:	06/03/2008

Bugzilla-Id:	3355		
Description			
If a cell contains a formula in an Excel spreadsheet, the DataSourcePreviewPanel just displays an empty column.			
This is because there's a case statement in the TableModel that doesn't handle the type of cell associated with formulas.			

History

Fixed by implementing code in POIExcelDataSource getCellValue to handle formulas. Note that there are limitations to the formula evaluating capabilities of the POI model, but most things are supported, so we should be OK.
