### Description

Need formal definitions for the responsible party roles that is usable by applications like morpho to help guide the user in their choice of roles. There's a lot of confusion about several roles, like originator/owner/principalInvestigator.

| Blocks EML - Bug #338: need coverage documentation, review all documentation | **Resolved** | **11/29/2001** |

## History

**#1 - 11/30/2001 04:37 PM - Matt Jones**

This should be done with the rest of the EML documentation review as found in bug # 338.

**#2 - 02/04/2002 05:48 PM - Matt Jones**

Chnaging target milestone for the major EML bugs to Beta7, which is scheduled for early to mid March for release. There are likely other bugs that need to be entered and resolved for this Beta7 release as well, so lets generate a complete list!

**#3 - 02/14/2002 05:19 PM - Matt Jones**

I think we need to carefully consider this list, and possibly revise it. We originally chose it to correspond to the ISO role codes, but what is important is that the various roles are 1) understandable, 2) exclusive (more or less), and 3) comprehensive. If they can't be comprehensive, then we need to consider making it an extensible domain instead of constraining it to these values.

No matter what we need to precisely define each of the roles that we decide to keep.

**#4 - 05/14/2002 11:20 AM - Matt Jones**

This list is now not part of the standard ResponsibleParty. It has been kept in case some elements want to create a role element. It has been extended so that, in addition to the enumerated values, any string can also be provided. We still may want to consider removing it alltogether.

**#5 - 06/13/2002 07:03 PM - Matt Jones**

List has been kept, and the list is just a set of suggested terms, but the user is free to put anything in the role elements. The important roles have been broken out as individual elements. FIXED.
