<b>Target version:</b>	1.9	<b>Spent time:</b>	0.00 hour
<b>Bugzilla-Id:</b>	3372		
<b>Description</b>			
Shaun made the perl token replacement changed for 1.9. These changes may affect the token replacement changes made in java. These need to be rectified.			

#### History

##### #1 - 01/05/2009 11:35 AM - Shaun Walbridge

Token replacement has been completed, and is stable with the changes made for 1.9. A single set of Java properties are used to manage both the Perl and Java code, primarily metacat.properties but also per-skin properties files (e.g. style/skins/nceas/nceas.properties). All previous Perl AppConfig (.cfg) files have been removed.
