

Metacat - Bug #3403

xmlns without a : is serialized incorrectly

06/19/2008 11:54 AM - Chad Berkley

Status:	Resolved	Start date:	06/19/2008
Priority:	Immediate	Due date:	
Assignee:	Chad Berkley	% Done:	0%
Category:	metacat	Estimated time:	0.00 hour
Target version:	1.9.1	Spent time:	0.00 hour
Bugzilla-Id:	3403		
Description			
if you upload a document with an xmlns=xxx instead of xmlns:y=xxx to metacat, it uploads correctly, but when you read the document, metacat erroneously puts a ":" into the xmlns, which makes the document invalid.			

History

#1 - 06/19/2008 01:33 PM - Chad Berkley

added an if statement to check for this condition. it now prints the xmlns out correctly.

#2 - 03/27/2013 02:23 PM - Redmine Admin

Original Bugzilla ID was 3403
