Description

Bruce Sorrie just sent a long list of county site records, but we have no way to add these as blue records other than to pretend they are plots and give Bruce his own corner of the CVS dataset. We need a new blue category for site records contributed by individuals.

We also lack a way to see details of plots, such as geocoordinates, placenames, dates, observer, and co-occurring species. This suggests the need for a new tab for site records, similar to the tab for specimens.

History

#1 - 06/28/2008 10:43 AM - Robert Peet

The proposed new tab should include information on plots as well as site records
