

InfoVeg - Bug #3427

Pull VMD data from web (workshop '08)

06/25/2008 03:46 PM - Michael Lee

Status:	Resolved	Start date:	06/25/2008
Priority:	Normal	Due date:	
Assignee:	Michael Lee	% Done:	0%
Category:	EntryDB	Estimated time:	0.00 hour
Target version:	2009-Jan	Spent time:	0.00 hour
Bugzilla-Id:	3427		
Description			
A new web-based system of delivery to contractors of baseline/previous data (to be inserted into the data tool to generate datasheets) will be developed prior to the 2009 season.			
Michael will check into better automating downloading data (see VegBranch) and write a tool that puts the data from the archive database onto CVS webspace. Party will be omitted. Just stems, notes, plots will be included.

History

#1 - 06/25/2008 05:50 PM - Michael Lee

application.importXML() can pull data from the web WITHOUT PROMPTS and seemingly without internet issues, but it excludes Access 2000 as an option. We could use this function to pull data, since it doesn't require prompts and firewall issues. For Access 2000 users, it would be nice to have a fall-back plan, perhaps importHTML?

#2 - 08/08/2008 12:05 PM - Michael Lee

This now works for Access 2002+ users. It remains to be seen whether we need a backup option for Access 2000 users. If they need data, they can email us, we could pop it into an entry tool and send it to them, which is what we do now, only it's not quite that easy for us now.

#3 - 08/11/2008 10:55 AM - Michael Lee

I added a blurb for access 2000 users to email cvs (at) unc.edu to get their data.
