

FIRST - Bug #3441

Next button is not disabled on last page when isNextEnabledInitially is true

07/09/2008 12:56 PM - Ryan McFall

Status:	Resolved	Start date:	07/09/2008
Priority:	Normal	Due date:

Target version:	Unspecified	Spent time:	0.00 hour
Bugzilla-Id:	3441		
Description			
The WizardFrame class needs to know when it's on the last page and not allow the next button to be enabled when it is, even if that page reports that next should be enabled initially. The same is true for the first page and the previous button.			

History

#1 - 07/11/2008 04:14 AM - Ryan McFall

Fixed by adding the isFirstPage and isLastPage methods to the WizardController interface, and implementing these methods in the implementations of WizardController. WizardFrame's addCurrentPanel was also modified to make use of this information.
