

FIRST - Bug #3442

Add first/last page buttons to PDFPane and ExtractedQuestionsPane

07/09/2008 12:58 PM - Ryan McFall

Status:	New	Start date:	07/09/2008
Priority:	Normal	Due date:	
Assignee:	Ryan McFall	% Done:	0%
Category:	client	Estimated time:	0.00 hour
Target version:	client-alpha3	Spent time:	0.00 hour
Bugzilla-Id:	3442		
Description			
Add these buttons along with associated actions, and change icons to be ASCII <<, <, >, >>, and make sure that tool tip text is enabled for them.			

History

#1 - 02/12/2009 10:57 AM - Ryan McFall

The functionality for first/last page buttons is now there. We need to (possibly) build icons, or change the previous/next buttons to be ASCII.

#2 - 02/24/2009 11:58 AM - Sandeep Namilikonda

Browsing through the question list is more cumbersome than the PDF document itself as there can be far more number of questions than there are pages.

Ideally, a "go to" combo box with a drop-down list of all question numbers would be good. Next and previous buttons, though useful, cannot provide random access to any question.

#3 - 02/26/2009 02:50 AM - Ryan McFall

Sandeep, I think you're misinterpreting this particular bug, as this one is related to having next/last page buttons, not buttons to navigate questions.

I agree having random access to questions would be good. Depending on the user's workflow, easily allowing progression to the next question and previous question would probably be quite helpful, as most people I've watched testing have looked at questions sequentially to verify that they were parsed correctly.

The only thing left on this bug will be to get some icons for the next/last page buttons that look OK.
