Target version:	client-alpha2	Spent time:	0.00 hour
Bugzilla-Id:	3456		
Description			
Question text from parsed assessment is not displayed - possibly due to the migration from question prompt to response item prompt.			

History

#1 - 07/24/2008 01:28 PM - ben leinfelder

i'm using the following XPath expression to set the prompt for the question:

```
//*[@local-name()='questestinterop']/*[local-name()='assessment']/*[local-name()='section']/*[local-name()='item']/*[local-name()='presentation']/*[local-name()='flow']/*[local-name()='material']/*[local-name()='mattext']
```

perhaps the qti serialization used by the parser has changed...

#2 - 10/08/2008 08:57 PM - ben leinfelder

we may also want to reevaluate using <html> in the <mattext> tags for prompts and choices. it can get a little unwieldy

#3 - 11/04/2008 09:38 AM - ben leinfelder

Question prompt text is showing in the Data Import Wizard when mapping questions to score/response/feedback columns
