Morpho - Bug #3458

Morpho will take long time to startup if the metacat host server is down

07/24/2008 03:40 PM - Jing Tao

Target version:	1.9		**Spent time:**	0.00 hour
Bugzilla-Id:	3458			

Description

If morpho is pointing to a host which is down (not only tomcat was shut down, but also the machine was shut down), it will take about 2 minutes to startup. I found this bug first in cvs head. Then I double checked the 1.6.1 release and it has same behavior.

History

#1 - 08/12/2009 03:32 PM - Jing Tao

move to 1.7.1

#2 - 12/17/2009 10:37 AM - Jim Regetz

We observed similar behavior on two machines this morning while metacat was down. However, rather than starting up after ~2 minutes, morpho failed to progress beyond the splash screen at all until metacat was restarted >10 minutes later.

Observed both with 1.7.0 and a recent dev build (svn r4702).
