Description

Morpho now selectively displays eml documentation. Need to make sure that it
displays all of the EML documentation comprehensively. Probably best if it
would read the docs directly out of the XML Schema files.

History

#1 - 11/30/2001 03:00 PM - Matt Jones

Short term: copy ALL documentation to morpho where it is needed.

Long term: create way to get info directly from XSD files.

#2 - 12/17/2001 05:06 PM - Chad Berkley

all of the documentation is now copied for release 1. I have written a parser which kind of works for creating the documentation in
dmanclient/exp/EditorConfigMaker. This is a possilbe jumping off point for the long term goal of reading docs from the xsd file or actually using the
xsd files instead of dtds.
