Description

Currently only the ESA domain is set up to work with lsid. We need to delete the lsid section from the stylesheets that create the citation section for the data sets other than ESA ones.

Here is an example

Data Set Citation
Walker M. . A Circumpolar Comparison of Tundra Response to Temperature Manipulation: A Synthesis of International Tundra Experiment Data.
KNB Data Registry: urn:lsid:knb.ecoinformatics.org:nceas:146:8 (http://knb.ecoinformatics.org/knb/metacat/nceas.146.8/nceas).

It was hoped that this would be set up for this release but there was more involved than anticipated
