<b>Description</b>			
Mapbuilder does not display maps on firefox version 3			

#### History

##### #1 - 08/25/2008 06:49 PM - ben leinfelder

i've added the Map Builder 1.5rc2 code to metacat trunk and altered the SANParks skin's map to use the new approach. This does work in FF2 and FF3 (with firebug disabled!). The spatial query is working, as is zoom and pan. I still need to figure out how to implement the predefined locations drop down. Also, we will need to edit the <skin>/spatial/\*config.xml files that define how maps are rendered in the skins that incorporate them (sanparks, saeon, knb, others?). I'll wait to do this until resolving the locations drop down issue.

##### #2 - 08/25/2008 06:51 PM - ben leinfelder

one more thing - the "old" way of doing the maps won't work now when running from metacat's trunk

##### #3 - 08/26/2008 04:59 PM - ben leinfelder

Predefined locations are now working in all the skins that use maps. Turning layers on and off also works for the maps. Being installed on dev server for additional testing.

##### #4 - 09/29/2008 10:08 AM - ben leinfelder

looks good on dev server - even with firebug enabled (ff 3.0.3 with fb 1.2.1 on my Mac).
