<b>Target version:</b>	Beta2	<b>Spent time:</b>	0.00 hour
<b>Bugzilla-Id:</b>	347		
<b>Description</b>			
The eml-distribution module is now incorporated into eml-dataset. We should remove it from morpho as a standalone module altogether.			

### History

#### #1 - 11/29/2001 09:43 PM - Dan Higgins

Upon reviewing eml-dataset schemas in mdstandards module, I cannot find any place where eml-distribution is actually folded into eml-dataset (and it is NOT in the current dtd).

#### #2 - 11/30/2001 09:06 AM - Matt Jones

It is embodied in the onlineURL and offlineMedium fields from eml-resource, which is the supertype of eml-dataset. These fields used to be in eml-distribution, but we decided to move them at the last developers meeting regarding EML. The remaining eml distribution elements were not considered necessary, but I haven't finished reviewing them so I haven't yet deleted the module.
