Bugzilla-Id:	3476		

Description

Intermittent software 'lockup' (approx 50 % of attempts results in the condition):

Occurs on Ubuntu 7.10 platform, JRE 1.5.0.13, Morpho 1.6.1 -

To re-create:

1) Start Morpho (from command line) and log in
2) Search Network and Local, All, search string: 'NCEAS 2017'
3) From search results, select (double click) DocumentID chadden.48.2
for viewing.
4) Here is what happens: When I select the item, it immediately changes
to another item in the list (e.g., to the entry for DocID nceas.149.17)
5) When this happens, the list 'locks up', and selections can not be made.

Again, this only happens about 50 % of the time, and only on Ubuntu (so far).

History

#1 - 08/27/2008 08:38 AM - ben leinfelder

When running on the Mac, I noticed that a single click on chadden.48.2 would reorder the list, making it very easy to double click on a different item.
