

Morpho - Bug #349

failure when entering table description

11/29/2001 07:27 PM - Matt Jones

Description

Morpho fails with an error when entering a new table description without pointing at an object. One should be able to provide a metadata-only description of the table (we'll eventually want to use this feature to configure data entry forms).

To reproduce:

Package editor -> Add -> Import Data

Leave data field blank

choose "manually enter field descriptions"

enter metadata for the entity and attributes

when you hit "Next" it fails with the error:

"Error saving file: NULLDATAFILE (No such file or directory)"

Instead, it should add the entity and attribute metadata files, and the table editor should change the "View data" button to "Associate data" in order to allow the user to come back later and associate the data file with the metadata description that was produced. At that point in time the eml-physical description would be added.

History

#1 - 12/10/2001 12:02 PM - Dan Higgins

Problem with importing data without actually including a data file has been fixed. "Associate Data" button now appears when there is no actual data associated with the metadata.
