

EML - Bug #3503

Develop method for cross-links between EML resources

09/30/2008 04:22 PM - Margaret O'Brien

Status:	New	Start date:	09/30/2008
Priority:	Normal	Due date:	
Assignee:	Matt Jones	% Done:	0%
Category:	eml - general bugs	Estimated time:	0.00 hour
Target version:	Postpone	Spent time:	0.00 hour
Bugzilla-Id:	3503		

Description

Some EML documents can be imbedded inside others, e.g., protocols and citations under dataset/methods. This is appropriate for some uses, but there are connections between some resources that require another type of cross link.

Example: a published citation used data from dataset.xxx.2, and should be able to include a reference to this dataset in its description. If dataset.xxx is updated to revision 3, the link between the citation and dataset.xxx.3 is not appropriate, although the relationship to rev 2 still exists.
