

Metacat - Bug #3507

Reconfigure database credentials locks you in configuration

10/06/2008 03:40 PM - Michael Daigle

Status:	Resolved	Start date:	10/06/2008
Priority:	Normal	Due date:	
Assignee:	Michael Daigle	% Done:	0%
Category:	metacat	Estimated time:	0.00 hour
Target version:	1.9	Spent time:	0.00 hour
Bugzilla-Id:	3507		
Description			
If you update the database credentials to point to a 1.9 database, the configuration utility thinks the system still needs to be configured. It doesn't allow you to change anything so you keep going to the config util.

This is a special case. If the database is changed in the background (which shouldn't ever happen), the user would need to change the databaseConfigured value to true in metacat.properties.
