Metacat - Bug #3509

Fix XML Schema filesystem namespace conflicts and backups

10/08/2008 08:45 AM - Michael Daigle

Status:	New		**Start date:**	10/08/2008
Priority:	Normal		**Due date:**	
Assignee:	ben leinfelder		**% Done:**	0%
Category:	metacat		**Estimated time:**	0.00 hour
Target version:	2.x.y		**Spent time:**	0.00 hour
Bugzilla-Id:	3509			

Description

Currently, two schema files with the same name but different namespaces will try to get written to the /schema directory. This will cause conflicts. The file should be written to /schema/<namespace> directory.

Also, schema files should be backed up to an external directory from the application. In this way, custom schemas will not get lost when metacat is upgraded.

History

#1 - 03/27/2013 02:23 PM - Redmine Admin

Original Bugzilla ID was 3509

#2 - 04/09/2013 04:07 PM - ben leinfelder

- Assignee changed from Michael Daigle to ben leinfelder

- Target version changed from Unspecified to 2.1.0

This can certainly cause issues when remote XSDs happen to have the same filenames (as many versioned schema do)

#3 - 07/09/2013 02:23 PM - ben leinfelder

- Target version changed from 2.1.0 to 2.x.y
