Description

-Checkboxes are awkward (use add/remove like in VegBank)
-State of shopping cart should be evident from all screens
-Metadata field selections should not be done from the individual assessment view

History

#1 - 10/30/2008 01:23 PM - ben leinfelder

-No more checkboxes: Assessments are added /removed from the cart one at a time by clicking the appropriately toggled button (+ or -)
-Search results reflect the items that are already in the cart
-Metadata fields are only specified as one of the final steps in the shopping cart screen
